Course	College/University	Year	CGPA/%
B.E. Information Science	MVJ College of Engineering, Bengaluru	2022-26	8.5/10.0
Class XII (CBSE)	New Horizon School, Bihar	2022	81%

WORK EXPERIENCE

- **AI/ML Intern | Internpe** [Jul'25-Aug'25]
 - Automated test case generation using NLP and FAISS semantic search, reducing manual effort by 70%
 - Designed intelligent deduplication algorithm analyzing 500+ test cases, improving data integrity by 40%
 - Built automated PDF reporting system for comprehensive test documentation and data-driven insights
 - Developed Flask-based analytics platform with offline capabilities, processing 1000+ documents at 95% accuracy

SKILLS & INTERESTS

- **Programming Languages:** Python, SQL, JavaScript, PHP, HTML, CSS
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Excel, Statistical Modeling, Data Visualization
- **Machine Learning:** TensorFlow, PyTorch, Scikit-learn, LSTM, SVM, Feature Engineering
- **Tools & Databases:** MySQL, Git, Jupyter Notebook, VS Code, Postman, FAISS, Flask, REST APIs
- **Interests:** Data Analytics, Machine Learning, NLP, Predictive Modeling, Business Intelligence

PROJECTS

- **Sentiment Analysis Engine | Python, LSTM, NLP, TensorFlow** [2024]
 - Built end-to-end sentiment classification pipeline achieving 91% accuracy on test dataset
 - Processed 10K+ text samples per minute for real-time business intelligence applications
 - Implemented feature engineering, text preprocessing, and evaluation framework with precision/recall/F1-score metrics
- **Fake News Detection System | Python, SVM, LSTM, Scikit-learn** [2024]
 - Designed ML classification pipeline achieving 89% precision and 87% recall for news authenticity verification
 - Performed extensive feature engineering and statistical analysis on 50K+ news articles for model training
 - Conducted comparative analysis between SVM and LSTM models with data visualizations and monitoring dashboard
- **SpecTacular.AI - Document Analytics Tool | Python, Flask, FAISS, NLP** [2024]
 - Developed automated document processing system using semantic search for intelligent data extraction
 - Implemented similarity matching algorithms reducing duplicate entries by 85% through clustering techniques
 - Built Flask-based analytics dashboard processing 200+ documents/hour with structured data extraction
- **Image Compression Analytics | Python, Autoencoders, PCA, Deep Learning** [2024]
 - Applied dimensionality reduction techniques achieving 60% compression with quality preservation
 - Conducted statistical analysis comparing traditional vs ML-based compression across 1000+ images
 - Optimized neural network architecture through A/B testing and performance benchmarking
- **Real-Time Object Detection for Visually Impaired | Python, YOLO, OpenCV** [Jan'24]
 - Developed wearable assistive technology achieving 92% detection accuracy under dynamic conditions
 - Implemented multi-modal feedback system with auditory and haptic notifications
 - Integrated edge computing capabilities for real-time processing without internet dependency

CERTIFICATIONS & ACHIEVEMENTS

- **Data Analyst Certification** - Professional certification in data analysis and statistical modeling
- **Deloitte Australia** - Data Analytics Job Simulation program completion
- **Tata Group** - GenAI Powered Data Analytics Job Simulation certification
- **AWS Educate** - Introduction to Cloud Computing 101 certification
- **Academic Excellence** - Consistent 81% across all academic levels
